

kaza LIVE alert

Pack dimensions: 85 x 145 x 30 mm
Product dimensions: 20 x 12 x 240 mm

Weight: 50 gr
Product Weight: 21,5 gr

KAZA LIVE ALERT is the only vibrating sensory device designed to warn in advance of fixed radars and hidden speed controls on our roads. An essential ally that is ideal for all types of drivers, including those driving a motorcycle. Simple, discreet and comfortable, even under close-fitting motorcycle apparel.

Entirely "hands free", it will notify you in advance if you need to exercise precaution on the road. Its warnings in variable and progressive vibration mode will indicate when you must moderate your speed as you approach a radar-controlled area. **KAZA LIVE ALERT** is very precise and reliable. The closer you are to an area monitored by a radar, the more frequent the warnings (vibrations) received through the wristband.

KAZA LIVE ALERT is a **COMMUNITY WARNING ELEMENT** that can connect in real time to our **LIVE** community via the **KAZA LIVE APP**, so you will receive thousands of collective community warnings that include the presence of the Pegasus helicopter and camouflaged mobile radars. In addition, the database is automatically updated.

Furthermore, **KAZA LIVE ALERT** can also work as a **FITNESS** watch. Paired with your phone and our **FITNESS APP**, you will receive accurate and reliable figures on calorie consumption, distance traveled, steps taken, sleep monitoring, etc.

Main features:

Radar Protection Mode.

- Fixed radar warnings via the permanent KAZA database.
- PEGASUS helicopter sightings via LIVE Community reports.
- Mobile radar warnings via LIVE Community reports.
- Police control warnings via LIVE Community reports.
